The work I've done has been in the news

I don't harm animals in my work

I go to events, like lectures, to tell people about my work

My work will save some lives, but not many people have the disease I study

My work won't save any lives but will seriously improve lots of lives

(e.g. helping people to walk again)

My conclusions are based on lots of accurate data

My work could make a lot of money

My work will improve the field of cosmetic plastic surgery

I have a Nobel Prize

I'm very good-looking

My work will help us to protect the environment

My work will help make cars that go faster

My work will help us use less products made from crude oil

Lots of other scientists think my work is wrong

Lots of other scientists think my work is right

I have tested my theory in lots of ways and haven't been able to disprove it

I don't believe in God

My work will help us to understand how our brains work

I give lots of time and money to charity

I believe in God

My work will help us explore space

My work will help companies make more money

My work will mean more people can have access to safe drinking water

---

My work will help people around the world communicate faster
